EXPERIENCE

Staff Software Engineer - UI
MediaMath   2017 - Present

Provide technical direction for the UI engineering organization.

- Assume ownership of the code base and ensure all changes meet our quality standards
- Lead the technical architecture and delivery of complex projects
- Provide mentoring opportunities for junior engineers
- Collaborate with product, design, and other stakeholders across the organization

Senior Product Designer
Nasdaq   2013 - 2016

Serve as the product design team's technical director.

- Lead the creation of style guides and a pattern library for teams across the organization
- Establish coding standards, guidelines and develop frameworks to enable rapid prototyping
- Participate in user research, discovery interviews, and usability testing
- Design and develop high fidelity prototypes using HTML, CSS and JS
- Interaction work patented by Nasdaq (US D764,543)

Senior Web Developer
Thomson Reuters   2005 - 2013

Build and maintain Thomson Reuters' Investor Relations hosting platform. Responsible for front end development using ASP.NET, HTML, JS, and CSS.

- Develop reusable front end components that power investor relations websites for Fortune 500 companies
- Contribute to middle tier and database development
- Write and unit test code for new products and bug fixes
- Write and review technical specifications

Website Developer
Thomson Financial   2002 - 2005

Work closely with product managers to build investor relations websites for clients.

- Develop and document well-designed and easily maintainable websites using HTML, JS, CSS and other web technologies
- Provide support and knowledge sharing with other site building teams and account managers
